

# SpeedNews Aerospace Raw Materials & Manufacturers Supply Chain Conference

This Conference is designed to serve a full range of materials and parts manufacturers in the dynamic global commercial and defense markets. The agenda includes topics of interest for equipment OEMs, sub-tier manufacturers, supply chain executives, market analysts, investment bankers, and material and parts suppliers. Speakers will address a range of important topics including supply chain strategies, demand outlook for aerospace part manufacturers, market and supplier trends, innovation and technology, and the impact of new materials challenging traditional material manufacturing.
